Summary

Senior Product Designer with 8+ years leading end-to-end design for enterprise and consumer digital products across telecom, fintech, government, healthcare, and SaaS. Track record of building scalable design systems, leading multi-persona enterprise platforms, and mentoring design teams across the GCC, Turkey, Africa, and the US. Comfortable owning a product from discovery through pixel-perfect delivery, and translating complex operational workflows into interfaces engineering teams can build without friction. Increasingly integrates AI-assisted design and prototyping tools (Figma AI, Lovable, Midjourney, ChatGPT, Claude) into the workflow to speed up ideation, concept exploration, and prototype validation, and uses Claude for AI-assisted coding and development work.

Professional Experience

Senior Product Designer

Nov 2024 – present

Zain KSA

Saudi Arabia

Full-time, Remote · Telecom Operator & Digital Service Provider · 1,000–5,000 employees

Lead product design for Zain Direct, an enterprise digital workplace unifying communication, ticketing, workflows, and business operations into a single product ecosystem across Web, Android, iOS, and PWA.

Key Contributions

- Lead product design for Zain Direct, serving an organization of 1,000+ employees across Web, Android, iOS, and PWA.
- Designed the UX architecture for 5 distinct user personas with tailored permissions and workflows, covering 8 core modules including Ticketing, Chat, Threads, Actions, Logs, and Account Management.
- Built and scaled a Design System adopted across the platform's modules, cutting new-screen design turnaround by an estimated 25–30% and improving front-end consistency for the engineering team.
- Ran UX audits and usability evaluations that informed iterative improvements to platform adoption among internal teams.
- Designed Sales Pipeline experiences and customer-facing product presentations supporting new business demos.
- Contributed to the ongoing redesign of Zain's main corporate website, starting with the B2B experience before transitioning scope to B2C-facing pages — using AI image-generation tools (Midjourney) for visual assets and AI-assisted design tools (Figma AI, Figma Make, Lovable) to rapidly test layout and interaction concepts, cutting early-stage concept turnaround by an estimated 40–50%.

Product Design Lead

Jan 2024 – present

TheLOCTech

Saudi Arabia

Freelance, Remote · Software House · 11–50 employees

Provide strategic product design leadership across enterprise and platform products for regional markets, driving initiatives from product discovery to production while establishing scalable design practices and mentoring design teams.

Key Contributions

- Lead product design strategy across a portfolio of 5+ enterprise and platform products for clients across the GCC and Turkey, balancing localization with a unified product vision.
- Mentor a design team of 2–4 product designers through structured reviews, raising design QA pass rate on first handoff.
- Established shared design systems and reusable component libraries reused across multiple client engagements, reducing design ramp-up time for new projects.
- Embedded AI tools (ChatGPT, Claude, Midjourney, Lovable) into the design and prototyping process across client projects — for research synthesis, concept moodboards, and clickable AI-built prototypes — cutting time spent on research, exploration, and early prototyping by an estimated 50–60%.
- Used Claude for AI-assisted front-end coding, turning design concepts into functional prototypes faster for client reviews.

Senior Product Designer

Sep 2022 – Nov 2024

PaySky Inc.

Egypt

Full-time, Hybrid · Fintech, Financial Services · 51–200 employees

Led product design across a portfolio of fintech, government, and merchant platforms, shaping digital experiences that supported payment modernization, enterprise operations, and public digital transformation initiatives throughout Africa and the Middle East.

Key Contributions

- Led product design across a portfolio of 6+ fintech, government, and merchant platforms serving markets across Africa and the Middle East.
- Designed the Government Collection System (GCS), a national-scale digital payment collection platform for government entities across African markets.
- Designed the Yalla Super App experience across 4 markets (Egypt, UAE, KSA, and Pakistan), aligning a single product vision with local market needs.
- Built a reusable design system adopted across the product portfolio, reducing design-to-development handoff time by an estimated 20–25%.
- Conducted UX research and usability testing that directly shaped merchant dashboard and payment flow improvements.

Part-time, Remote · Software House · 51–200 employees

Designed digital products across healthcare, enterprise, and business domains, transforming complex operational requirements into intuitive user experiences while collaborating with multidisciplinary teams throughout the product development lifecycle.

Key Contributions

- Designed end-to-end product experiences across 3+ healthcare, enterprise, and business solutions, simplifying complex clinical and operational workflows into intuitive interfaces.
- Delivered responsive web and mobile interfaces with accessibility as a core requirement, working directly with healthcare professionals to validate flows.

Part-time, Remote · Food & Beverage Manufacturing · 11–50 employees

Designed digital products for startups across the foodtech, cloud kitchen, health & nutrition, and consumer brands sectors, helping transform early-stage ideas into scalable digital experiences.

Key Contributions

- Designed a cloud kitchen management platform and customer-facing ordering journey, plus a nutrition and calorie-tracking mobile app, for an early-stage foodtech startup.

Freelance, Remote · Production · 11–50 employees

Designed digital products and brand experiences across fintech, blockchain, and business solutions.

Key Contributions

- Designed fintech products including Bitcoin, cryptocurrency, and digital wallet platforms, plus 5+ responsive websites for clients across industries.

Full-time, Remote · Software House · 11–50 employees

Started as a Front-End Developer before moving into UI/UX Design, where I designed a SaaS platform for restaurants, bars, and nightlife businesses, covering operations, CRM, marketing, and customer engagement.

Key Contributions

- Started as a Front-End Developer before transitioning into UI/UX Design; designed a SaaS platform for restaurants, bars, and nightlife venues covering CRM, booking, staff management, and loyalty workflows, supporting white-label deployments across multiple client brands.

Skills

- User Experience (UX) Design
- User Interface (UI) Design
- Design Systems
- Prototyping & Interaction Design
- Information Architecture
- Design Thinking & UX Strategy
- Cross-functional Collaboration
- Design Team Mentorship
- AI-Assisted Product Design
- Rapid Prototyping with AI Tools
- AI-Assisted Development

Tools

- Figma
- Sketch
- Adobe Creative Suite (XD, Photoshop, Illustrator, & more)
- JavaScript & Flutter
- Figma AI & Figma Make
- Lovable
- Midjourney
- ChatGPT
- Claude (Design & Development)

Education

Bachelor's Degree in Languages & Translation | October 6 University | 2012
